

# Grant Writing & Management

Engineering | Planning | Environmental

We are experienced in the development of financing solutions for important public facilities, including utility systems, landfills, public buildings, schools and projects that support economic development programs.

BREC also offers assistance to our clients in evaluating public finance issues and alternatives. We understand the legal framework for public finance, which is established by state general statutes, and we are experienced with the budgetary processes and fiscal limitation of Municipal Governments. Further, we are well-versed in the relevant regional, state and federal grants assistance programs and the agencies who administer these programs.
