

# Pond & Lake Design

Engineering | Planning | Environmental

BREC has designed and constructed more than 5 lakes and ponds throughout the southeastern United States. Our firm has a vivid understanding of current trends in pond and lake design. Pond and lake design is a holistic and comprehensive process that can involve numerous government agencies. Our staff has experience permitting these projects with the United States Army corps of Engineers, state offices of water quality, and dam safety organizations.

Our firm can complete any level of service that the client desires. Beginning with project feasibility and budgets to complete dam engineering and construction oversight, our firm has the knowledge, skills, and abilities to see your project to fruition.

## BREC provides the following Pond and Lake Design services:

- Residential Lake Design
  - Farm Ponds
  - Waterfowl and Wildfire Impoundments
  - Trout and Aquaculture Ponds
  - Golf Course Ponds/Lakes
  - Irrigation Ponds
  - Fire Suppression Ponds
