

# Wetland Delineation & Restoration

Engineering | Planning | Environmental

Since the passage of the Clean Water Act in 1972, identification and protection of wetlands has been a national mandate. BREC's experience provides clients with top expertise in local, state, and federal regulations. Our ability to rapidly identify potential environmental and ecological constraints enables us to provide regulatory and site design support to clients as well as streamline the process from the conceptual phase to construction oversight when Impacts are required we can permit and design any required mitigation.
